The cash register list in Hebrew (sample data, September 2026).

1 · Marketing summary

A cash register screen that a cashier can use without training, and a month-end Z report an accountant can file without retyping a number.

Built for the people at the register

Three big steps – month, branch, cashier – instead of small dropdowns. Anyone can find their shift in two taps.

Built for the accountant

A consolidated Z report in the structure accountants already know: charges, credits, net sales, payment methods and VAT, with an automatic check that the numbers add up.

Catches problems before they cost money

Missing Z numbers and registers left open are flagged on screen and on page 1 of the report.

Every field from the cash register

All the fields of the live cash register screen, plus a date column and 5 calculated accountant fields; pick 9, 14 or all 52 with one click.

Three languages, done properly

Hebrew, Arabic and English – the whole screen and the PDF flip direction, Arabic letters are joined, numbers stay in place.

Reports you choose

Pick which tables go into the PDF and which columns each one shows; the choice is remembered.

Works on any device

Desktop, tablet and phone; the table becomes cards on a phone.

Taglines

Language	Tagline
English	From the register to the accountant – one click, three languages.
עברית	מהקופה לרואה החשבון – בלחיצה אחת, בשלוש שפות.
العربية	من الصندوق إلى المحاسب – بنقرة واحدة وثلاث لغات.

One screen, three languages

English – left-to-right.

2 · Screen elements

Top to bottom, as they appear on the page. "QA" lists what to check.

Element	What it does	QA check
Header strip	Logo, company name (פֶּקָאן זמאן / بیکان زمان / Pecan Zaman), report title with the selected period, language buttons, logged-in user, today's date.	Period text changes with the month filter. Language buttons: the active one is highlighted.
Language buttons	עברית · العربية · English. Switch every label, column name, month/day name, branch name, message, PDF and CSV. Hebrew and Arabic are right-to-left, English left-to-right. The choice is remembered; #he / #ar / #en in the link opens a language directly.	Whole layout mirrors (menu, filters, table, number alignment, details panel). Refresh keeps the language. No untranslated text in any language.
Menu bar	Home, Products, Customers, Sales, Cash registers (active), Purchasing, Expenses, Income, Reports, Settings. Demo only – links do not navigate.	Active item underlined. Scrolls sideways on a phone.
Page title + "Sample data" badge	Breadcrumb Dashboard / Sales / Cash registers. Badge marks that the numbers are sample data.	Badge visible in every language.
PDF summary... button	Opens the "What goes into the PDF report?" window (section 4).	Disabled while a file is being prepared.
CSV for Excel button	Downloads the rows on screen (all pages, current filters, current sort) with the columns that are shown.	File opens in Excel with correct Hebrew/Arabic (UTF-8 with BOM).
Step 1 - Which month?	Buttons for the current month and the 2 before it (with record counts), a list of the last 24 months by name, and "Or pick an exact date range" (from / to).	Default = current month. Picking dates switches to a custom range; from > to is swapped automatically.
Step 2 - Which branch?	Big buttons: All branches + each warehouse, with the number of Z reports in the period.	Count on "All" = sum of branch counts. Branches with 0 are faded but clickable.
Step 3 - Which cashier?	Big buttons: All cashiers + each user with an initial avatar and count. Cashiers with no registers in the chosen branch are faded, with a hint line.	Choosing a branch where the selected cashier has no rows resets the cashier to All.
"Showing ..." bar	Plain-language summary: number of registers, period, branch, cashier, sort ("Sorted by Z number · low to high ↑"). Each filter has ×; "Clear all" appears when anything differs from the default.	Clear all = current month, all branches, all cashiers, all statuses, Z ascending.
Summary tiles (6)	Z reports (+ open count), Total sales incl. VAT, Cash (+ transactions), Credit card (+ transactions), Bit (+ transactions), VAT.	Each tile equals the sum of its column over the filtered rows (all pages, not just the visible page).
Smart notes	Orange = needs attention: missing Z numbers per branch, registers still open. Grey = information: highest sale, daily average, refunds total.	Missing Z is checked per branch over the whole period, ignoring the cashier filter.
Search box	Finds by Z number, cashier or branch name (in the current language).	Typing "321" keeps only rows whose Z contains 321.
Status switch	All / Open / Closed.	Open shows only rows without a closing time.

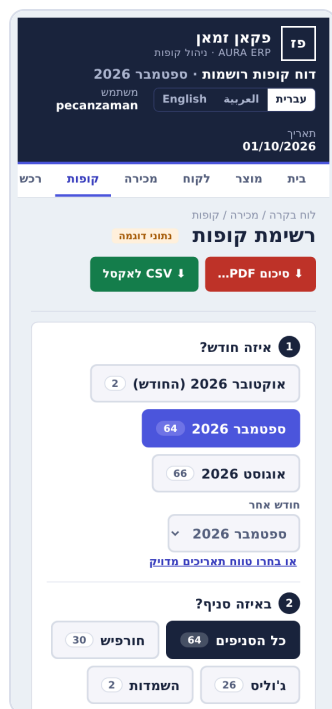

Element	What it does	QA check
Columns button + picker	Shows how many columns are on. Checkboxes in 7 groups; quick sets: Simple view (9), Accountant (14), All columns (52). Z number is always on. Remembered on this device.	The same choice is used by the PDF list and the CSV.
Table	Classic grid with zebra rows. Click a header to sort; click again to reverse. Amounts aligned to the end, negatives in red. Bold total row at the bottom (whole filtered set).	Opening balance has no total. Sort indicator ▲/▼ on the active column.
Pagination	31 rows per page by default; 62 or All. Page buttons and "Rows a-b of n".	Changing filters returns to page 1.
Details panel (🔍 Details)	Side panel with every field of one Z report.	Esc or clicking outside closes it.
Phone layout	Under 860 px the table becomes cards (Z badge, branch, cashier, date, status, 4 amounts).	No sideways page scroll at 390 px.

The screenshot shows the AURA ERP interface with a Z report table. On the left, there is a column picker with 7 groups of checkboxes and quick sets. The table has columns for date, status, cashier, branch, and amounts. The total row is bolded.

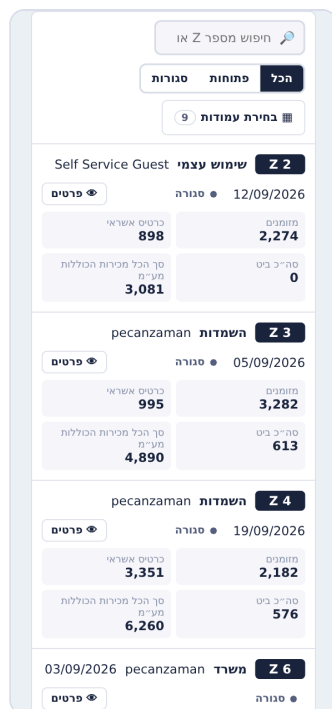

Column picker with the 7 groups and quick sets.

The screenshot shows the details panel for one Z report. The panel displays fields for date, status, cashier, branch, and amounts. The total row is bolded.

Details panel for one Z report.

Phone – filters.

Phone – cards.

Phone layout

Below 860 px wide the filters stack, the tiles become two per row and every Z report is a card with its four main amounts. Nothing scrolls sideways.

3 · Column dictionary (52 columns)

Order and Hebrew names follow the live system (pecanzaman.auratech1.tech/cash-register); the Date column is added for filtering and grouping. Five columns marked **calculated** are added for the accountant. Amounts are in ₪ with 2 decimals in the PDF; counts are whole numbers.

#	English (key)	עברית	العربية	Type	Meaning · QA · Total row
פרטי קופה · تفاصيل الصندوق · Register details					
1	Z number always on z	מספר Z	رقم Z	Text "Z n"	Z report number – the sequential closing number of the register. Always shown (cannot be hidden). Default sort: low to high. QA: Numbers run without gaps per warehouse; a gap shows a "Missing Z" warning. Clicking the header flips ▲/▼. Total row: —
2	Warehouse wh	מחסן	المستودع	Text	Warehouse / branch where the register was closed. Name is translated per language. QA: Matches the branch filter. Hurfeish / Julis / Disposals / Self use / Office. Total row: —
3	User user	משתמש	المستخدم	Text	User (cashier) who closed the register. QA: Matches the cashier filter. Latin user names stay in Latin in every language. Total row: —
4	Date day	תאריך	التاريخ	Date dd/mm/yyyy	Business date of the Z report. QA: Inside the selected month or date range. Total row: —
5	Drawer opens drawer	מונה פתיחת מגירה	عداد فتح الدرج	Count	How many times the cash drawer was opened during the shift. QA: Whole number. Total row: Sum of all rows
6	Status status	סטטוס	الحالة	Open / Closed	Open = the register has not been closed yet; Closed = Z report done. QA: Open rows are green. Status filter All/Open/Closed changes the row count. Total row: —
לרואה החשבון (מחושב) · للمحاسب (محسوب) · For the accountant (calculated)					
7	Total charges calculated charges	סך החיובים	إجمالي المبيعات	Amount ₪	Total charges = all sales before refunds: cash + credit card + cheques + other methods + unpaid sales. QA: charges – credits = net sales for every row. Total row: Sum of all rows

#	English (key)	עברית	العربية	Type	Meaning · QA · Total row
8	Total credits calculated credits	סך הזיכויים	إجمالي الإرجاعات	Amount ₪	Total credits = refunds and credits to customers: [cash refund + card refund + credit-voucher refund]. QA: Never negative here; shown in red with a minus sign in the PDF tables. Total row: Sum of all rows
9	Net sales calculated net	מכירות נטו	صافي المبيعات	Amount ₪	Net sales = total charges – total credits. Equals "Total sales incl. VAT". QA: Equals the "total" column for every row. Total row: Sum of all rows
10	Other payment methods calculated other	אמצעי תשלום אחרים	وسائل دفع أخرى	Amount ₪	Other payment methods = Bit + Cibus + Wolt + gift cards + coupons + deposits + points + credit-invoice payments. QA: Equals the sum of those 8 columns. Total row: Sum of all rows
11	VAT-liable amount (before VAT) calculated taxable	סכום חייב במע"מ (לפני מע"מ)	المبلغ الخاضع للضريبة (قبل الضريبة)	Amount ₪	VAT-liable amount before VAT = total sales – VAT-exempt sales – VAT. QA: taxable + VAT + exempt = total sales. Total row: Sum of all rows
אמצעי תשלום · وسائل الدفع · Payment methods					
12	Cash cash	מזומנים	نقدًا	Amount ₪	Cash received. QA: ≥ 0 . Total row: Sum of all rows
13	Cash count cashCnt	ספירת מזומן	عدد النقد	Count	Number of cash transactions in this Z report. QA: Whole number, never negative. 0 when the matching amount is 0. Total row: Sum of all rows

Option	Type	Details
Summary page	Always included	Cannot be turned off.
Sales by branch	On / off + its own columns	Z reports, Charges, Credits, Net sales, Cash, Card, Cheques, Other, VAT-liable, VAT, Exempt, Avg per Z, Share of sales. Default: Z reports, Charges, Credits, Net sales, VAT, Share.
Sales by cashier	On / off + its own columns	Same list. Default: Z reports, Charges, Credits, Net sales, Share.
Daily summary	On / off + its own columns	Same list + Day name. Default: Day, Z reports, Charges, Credits, Net sales, Cash, Card, Other, VAT.
Z report list	On / off	Uses exactly the columns of the table on screen. Changing them here changes the screen too. Quick sets: Accountant columns, Simple view, All columns.
Reset to defaults	Button	Restores all of the above. Choices are remembered on this device.

Every part of the report

Part	Fields	QA check
Header (every page)	Logo, company, report title "Consolidated Z report - {month}", generated date/time, user; under it the filter line: Period, Branch, Cashier, Status.	Filter line matches the screen filters.
Title + intro sentence	"This report combines N Z reports (register closings) from D working days[, X of them not closed yet]. Net sales = total charges minus total credits."	N = rows in the report; D = distinct dates.
4 key figures	Total charges · Total credits (red) · Net sales incl. VAT (dark box) · VAT collected.	Charges – Credits = Net sales.
Control box	Green "Control: OK" when all registers are closed and Z numbers are continuous; orange with the list of issues otherwise.	Same items as the orange smart notes on screen.

AURA ERP · Cash register list & Consolidated Z report · Field reference

Page 14 of 21

Part	Fields	QA check
1 • By payment method	Rows: Cash, Credit cards, Cheques, Other methods, Unpaid sales. Columns: Charges, Credits, Net. Total row. Green/orange line checks the net total against net sales.	Cash credits = cash refunds; card credits = card refunds; Other credits = credit-voucher refunds.
2 • VAT breakdown	VAT-liable amount (before VAT), VAT collected, Non-liable amount, Total net sales. Note with tips total and the Z number range.	Liable + VAT + Non-liable = Total net sales.
Glossary	One line explaining Z report, Charges, Credits, Net.	Shown when there is room on page 1.
3 • Other payment methods	Bit, Cibus, Wolt, Gift cards, Coupons, Deposits, Points, Credit-invoice payments and credit-voucher refunds with transaction counts.	Total = "Other methods" net on page 1.
4 • Highlights	Highest sale, daily average, refunds total.	Same as the grey smart notes.
5 • By warehouse / branch	One row per branch, highest net sales first, chosen columns, total row.	Totals equal page 1.
6 • By user (cashier)	One row per cashier, highest first.	Totals equal page 1. A heading never stays alone at the bottom of a page.
7 • Daily summary	One row per day with the day name; a month fits on one page. Best day highlighted green; Saturdays in grey.	Day names match the dates.
8 • Z report list	One row per Z report with the screen columns, sorted like the screen, at least 31 rows per page, total row on the last page. More than 16 columns → split into parts; Z number and date repeat in every part.	Dates and amounts are never cut; long names are shortened with "..." at their end.
Footer (every page)	"{company} · Internal document", "Page p of n", and a contents line (1-2 Summary · 3-6 Breakdowns · 7 Daily summary · 8 Z report list).	Numbers match the sections that were turned on.

Consolidated Z report - September 2026

Generated: 01/10/2026 08:29
User: pecanzaman

Period: 01/09/2026 - 30/09/2026 Branch: All branches Cashier: All cashiers Status: All

Consolidated Z report - September 2026

This report combines 64 Z reports (register closings) from 30 working days. Net sales = total charges minus total credits.

Total charges

All sales before refunds

₺288,253

Total credits

Refunds and credits to customers

₺2,192

Net sales

Incl. VAT

₺286,061

VAT collected

18% of the liable amount

₺42,828

Control: OK

All registers are closed and Z numbers are continuous.

1 By payment method

Payment method	Charges	Credits	Net
Cash	137,602.00	-1,319.00	136,283.00
Credit cards	128,245.00	-554.00	127,691.00
Cheques	4,033.00	0.00	4,033.00
Other methods	17,051.00	-319.00	16,732.00
Unpaid sales (delivery notes / invoices)	1,322.00	0.00	1,322.00
Total	288,253.00	-2,192.00	286,061.00

2 VAT breakdown

Line	Amount (₺)
VAT-liable amount (before VAT)	237,934.60
VAT collected	42,828.26
Non-liable amount	5,298.14
Total net sales	286,061.00

Tips (457.00 ₺) are not part of sales or VAT. Z reports included: 2-350.

OK: net total matches net sales in the Z reports

Glossary: Z report = one register closing · Charges = sales · Credits = refunds to customers · Net = charges minus credits

₺42,828

رقابة: سليم

كل الصناديق مغلقة وأرقام Z متتالية

1 تفصيل حسب وسيلة الدفع

وسيلة الدفع	مبيعات	إرجاعات	صافي
نقدًا	137,602.00	-1,319.00	136,283.00
بطاقات ائتمان	128,245.00	-554.00	127,691.00
مكشكات	4,033.00	0.00	4,033.00
وسائل دفع أخرى	17,051.00	-319.00	16,732.00
مبيعات بدون دفع (إرساليات / فواتير)	1,322.00	0.00	1,322.00
المجموع	288,253.00	-2,192.00	286,061.00

2 تفصيل الضريبة

الخط	المبلغ (₺)
المبلغ المسموح للضريبة (قبل الضريبة)	237,934.60
مبلغ الضريبة المحسنة	42,828.26
مبلغ غير مسموح للضريبة	5,298.14
إجمالي صافي المبيعات	286,061.00

البيانات (457.00 ₺) ليس جزءًا من المبيعات ولا من تقرير الضريبة. تقارير Z: 2-350.

سليم: الصافي يساوي صافي المبيعات في تقارير Z

الرموز: تقرير Z = إقفال صندوق واحد · مبيعات = مركات البيع · إرجاعات = مبالغ أمدت الترخيص · صافي = المبيعات ناقص الإرجاعات

AURA ERP · Cash register list & Consolidated Z report · Field reference

Page 18 of 21

6 · Formulas and a worked example

Figure	Formula
Total charges	cash + credit card + cheques + other methods + unpaid sales (delivery notes + tax invoices)
Total credits	cash refund + card refund + credit-voucher refund
Net sales	total charges – total credits = "Total sales incl. VAT"
Other payment methods	Bit + Cibus + Wolt + gift cards + coupons + deposits + points + credit-invoice payments
Total receipts	all payment methods + refunds (unpaid sales excluded)
Total sales incl. VAT	total receipts + unpaid sales
VAT	(total sales – VAT-exempt sales) × 18 / 118, rounded to 2 decimals
VAT-liable (before VAT)	total sales – VAT-exempt sales – VAT
Share of sales	row net sales ÷ net sales of the report × 100, one decimal
Average per Z	net sales ÷ number of Z reports
Daily average (notes)	net sales ÷ number of distinct dates
Missing Z (control)	per branch: every number between the lowest and highest Z in the period that has no row

Worked example - September 2026 sample, all branches, 64 Z reports

Payment method	Charges	Credits	Net
Cash	137,602.00	–1,319.00	136,283.00
Credit cards	128,245.00	–554.00	127,691.00
Cheques	4,033.00	0.00	4,033.00
Other methods	17,051.00	–319.00	16,732.00
Unpaid sales	1,322.00	0.00	1,322.00
Total	288,253.00	–2,192.00	286,061.00

VAT line	Amount ₪
VAT-liable (before VAT)	237,934.60
VAT collected	42,828.26
Non-liable	5,298.14
Total net sales	286,061.00

Checks that must hold

288,253.00 – 2,192.00 = 286,061.00 (net sales)

237,934.60 + 42,828.26 + 5,298.14 = 286,061.00

Tips 457.00 are outside both.

Rounding. Each row's VAT is rounded to 2 decimals and the totals add the rounded values, so the VAT total can differ by a few agorot from VAT computed on the grand total. Large amounts on tiles are rounded to whole shekels; the PDF tables show 2 decimals.

7 · QA test checklist

Run on desktop Chrome, then repeat the language cases on a phone. Tick the box when the expected result is seen.

ID	Area	Steps	Expected result	✓
TC-01	Default view	Open the page with no saved settings.	Current month, all branches, all cashiers, sorted by Z ascending, 31 rows per page, Simple view (9 columns).	☐
TC-02	Month filter	Click last month, then pick a month from the list.	Rows, tiles, notes and header period change; "Clear all" appears.	☐
TC-03	Date range	Pick From 15/09 and To 10/09.	Dates are swapped; list shows 10/09–15/09; month list shows "Custom range".	☐
TC-04	Branch + cashier	Pick Julis, then a Hurfeish cashier.	Cashier buttons for other branches are faded; impossible combination resets cashier to All.	☐
TC-05	Totals	Compare each tile with the total row of its column.	Equal to the cent, across all pages.	☐
TC-06	Sort	Click "Cash" twice.	Low→high, then high→low; the "Showing" bar text follows.	☐
TC-07	Columns	Choose Accountant, open the PDF window.	PDF window shows "The list will include 14 columns"; table on screen has the same 14.	☐
TC-08	Language	Switch to العربية, then English, then refresh.	Everything translated and mirrored; English is left-to-right; refresh keeps English.	☐
TC-09	Direct link	Open the page with #ar at the end of the link.	Opens in Arabic.	☐
TC-10	CSV	Download CSV in Hebrew; open in Excel.	Hebrew readable; header rows with period/branch/cashier; columns = screen; total row last.	☐
TC-11	PDF - summary	Download PDF for September with all sections.	Page 1 fits on one page; charges – credits = net; control line is green when no issues.	☐
TC-12	PDF - reconcile	Compare page 1 with the screen tiles.	Net sales = Total sales tile; VAT = VAT tile; Cash charges = Cash tile.	☐
TC-13	PDF - sections off	Turn off "Sales by cashier" and the daily summary.	Those sections disappear; section numbers and footer contents line are renumbered.	☐
TC-14	PDF - wide list	Choose All columns (52) and download.	List split into 4 parts; each part starts with Z number and date; ≥31 rows on full pages.	☐
TC-15	PDF - languages	Download in Arabic and in English.	Arabic letters joined and right-to-left; English left-to-right; numbers and brackets in the right place.	☐
TC-16	PDF - long text	Check a row for "Self use" / "שימוש עצמי" in the list.	Dates/amounts not cut; long names end with "..." on the reading end.	☐
TC-17	Open register	Look at the current month.	Open rows green; control box lists them; closing time "—".	☐
TC-18	Phone	Open at 390 px width.	Cards instead of table; no sideways scrolling; filters stack.	☐

Known limits of this demo

- Numbers are generated sample data for the last 3 months; nothing is read from or written to the live system.
- Menu items other than Cash registers do not navigate.
- The PDF uses its own font file (Hebrew, Arabic, Latin); it loads on the first download, so the first PDF needs an internet connection.
- Choices (language, columns, PDF options, rows per page) are stored in the browser of each device, not per user account.
